

We are a Copper, Vermiculite and Magnetite producer from underground and surface operations in an open, natural system bordering the Kruger National park nature conservation area. We are committed to produce and supply our products to local and global markets in an efficient, safe, healthy and environmentally responsible manner.

Our goal

As a leader in the mining industry, Palabora Copper (PC) strives to efficiently use and conserve all forms of energy while extracting and converting minerals and metals from the Palabora ore body.

Our commitment

We are committed to:

- Reduce our energy cost and specific energy consumption (unit of energy per ton of product produced) through Energy Efficiency at our operations
- Invest in technology that is energy efficient and commercially attractive
- Apply world-best-practices around Energy Management
- Equip employees with the necessary skills and knowledge to identify, quantify, implement and sustain energy saving initiatives
- Encourage and support employees to efficiently use and conserve energy across all sections of the mine
- Implement an Energy Strategy & Plan that will focus on short, medium and long term energy optimization initiatives in order to positively influence the bottom-line results of PC
- Create an environment that provides the support necessary to sustain and continuously improve on the commitments mentioned in this Energy Policy.

Our responsibility

- Each employee is responsible for ensuring and/or supporting the efficient use of energy, as well as the minimizing of energy wastage through energy optimization opportunities in his/her section
- Each employee is responsible for using energy efficient technologies/practices to conduct their work productively and safely
- Each employee is responsible for showing leadership through their approach towards energy and to hold each other accountable for the way in which we apply energy on site.

This policy shall apply to all PC's properties, business units, employees, and contractors in service to our portfolio.
